

# EARLY COLLEGE OPTIONS

---

Two opportunities to earn college credit exist for students in high school who want to get ahead or experience college early. Students may earn credit through either Concurrent Enrollment or Dual Credit Enrollment. Students will receive the whole experience of taking one or more college courses, preparing them even more for their college career after high school. Students admitted under one of these programs, who wish to continue in the summer or fall semester immediately following graduation from high school must apply for admission as a freshman and submit updated official documentation required to gain admission into their chosen undergraduate course of study at Texas A&M University-Kingsville. Students must maintain a 2.0 GPA at Texas A&M University-Kingsville to continue participating in these programs.
